

Wakanda Jobs — Revenue Strategy & Monetization Plan

Employer & Candidate Revenue Streams, with 1 / 3 / 6-Month Targets
June 2026

Wakanda Jobs already has the technical foundation for several revenue streams across both employers and job seekers. This document summarizes each stream, current pricing, and provides aspirational revenue targets for the next 1, 3, and 6 months — assuming active promotion of these features to existing users and steady growth in site traffic.

Employer Revenue Streams

1. Job Posting Packages & Recruiter Subscriptions

The core monetization engine. Employers buy a one-time bundle of job listings, or subscribe monthly for ongoing posting volume + premium tools (analytics, talent search, branding).

Package	Type	Price (USD)	Notes
Scout	One-time / Free	\$0	Free trial tier — 1-2 listings
Launchpad	Monthly / Free	\$0	Free recurring tier, limited
Pathfinder	Monthly	\$25	Entry recruiter subscription
Imani	One-time bundle	\$15	5 job listings
Ubuntu	One-time bundle	\$40	15 job listings
Sankofa	One-time bundle	\$65	25 job listings
Zambezi	One-time bundle	\$90	40 job listings
Baobab	One-time bundle	\$180	100 job listings
Vibranium	One-time bundle	\$400	250 job listings
Rising Star	Monthly	\$650	Growing teams, multi-seat
Growth Engine	Monthly	\$1,250	Mid-size recruiters
Enterprise Command	Monthly	\$2,500	Large enterprise
Continental Reach	Monthly	\$4,500	Multi-country employers
Talent Scout Pro	Monthly	\$7,500	Top-tier recruitment agencies

2. Featured Job Packages

One-time add-ons that boost a single job listing's visibility (top of search results, homepage placement, badge).

Package	Price (USD)	Duration
Standard Featured	\$10	7 days

Package	Price (USD)	Duration
Sponsored Post	\$20	14 days
Premium Featured	\$40	30 days

3. Banner Ad Placements (Country-Tiered Pricing)

26 ad placements across job listings, job detail pages, company profiles, candidate pages, blog, sidebars and footer. Each placement has a base price, with optional pricing tiers so visitors from higher-income regions are charged more for the same slot. Two tiers are now configured:

- Tier 1 — North America & Europe (USA, UK, Germany, France, Holland, Denmark): premium pricing, e.g. 2-3x base rate
- Tier 2 — Southern Africa (South Africa, Botswana, Namibia, Zimbabwe, Eswatini, Mozambique, Lesotho, Malawi): mid-tier pricing, e.g. 1.5x base rate
- All other countries (incl. Zambia): base/default price

Indicative base pricing per placement: \$20–\$50/month for high-traffic slots (job listings top, job detail bottom), \$10–\$25 for sidebar/footer slots. Self-serve: employers upload their own creative and pay via the existing payment gateways; admin approves before it goes live.

Candidate Revenue Streams

1. Job Alert Subscription Packages

Candidates pay for higher-volume or unlimited personalized job alerts delivered by email, beyond the free tier.

Package	Price (USD/month)	Alerts
10 Alerts/Month	\$5	10 matched alerts
30 Alerts/Month	\$10	30 matched alerts
50 Alerts/Month	\$15	50 matched alerts
Unlimited Alerts	\$25	Unlimited matched alerts

2. VIP WhatsApp Job Alerts

Premium tier delivering real-time, filtered job matches directly to the candidate's WhatsApp via the Whapi integration — higher perceived value than email alerts.

Plan	Price	Duration
VIP Weekly	K5 (~\$0.20)	7 days
VIP Monthly	K18 (~\$0.70)	30 days

3. Career Services (CV Review & Coaching)

One-time paid services where candidates submit their CV for AI-assisted scoring/feedback plus review by an assigned career coach.

Service	Price	Notes
Basic CV Review	K219 (~\$8.50)	AI scoring + coach feedback

4. Planned / Scaffolded Candidate Monetization (Not Yet Live)

Models and database tables already exist for these — they need pricing, UI, and a launch push:

- Talent Unlock — employers pay a small fee to unlock a candidate's contact details (revenue from employer side, but incentivizes candidates to keep profiles complete)
- CV Reveal — pay-per-view access to a candidate's full CV/resume
- Salary Report Purchases — paid access to aggregated salary benchmarking reports by role/industry/country
- Verification Badge — candidates (and companies) pay a small fee for a verified profile badge, increasing trust and visibility
- Credits System — a generic prepaid credit wallet that can be spent across any of the above features, encouraging bulk top-ups

Revenue Projections — Next 1 / 3 / 6 Months

Aspirational monthly run-rate targets, assuming active promotion of all monetization features (see assumptions below).

Revenue Stream	Month 1	Month 3 (run-rate)	Month 6 (run-rate)
Job Posting Packages & Subscriptions	\$300	\$1,500	\$4,000
Featured Job Packages	\$150	\$500	\$1,200
Banner Ad Placements (incl. country tiers)	\$200	\$800	\$2,000
Job Alert Packages (Candidates)	\$150	\$600	\$1,500
VIP WhatsApp Alerts (Candidates)	\$50	\$250	\$700
Career Services (CV Review)	\$80	\$300	\$700
Talent Unlock / CV Reveal (new launch)	\$0	\$150	\$600
Salary Reports (new launch)	\$0	\$0	\$200
Verification Badges (new launch)	\$0	\$0	\$300
TOTAL (monthly run-rate)	\$930	\$4,100	\$11,200

Assumptions & Notes

- Estimates are aspirational targets, not guarantees — they assume active promotion (email/WhatsApp campaigns to existing users, in-app prompts, homepage banners) and steady traffic growth.
- Month 1 reflects current low-volume traction across most streams.
- Month 3 assumes country-tiered ad pricing is fully configured for all 26 placements, and the job alert / VIP alert funnels are actively marketed to the existing candidate base.
- Month 6 assumes the scaffolded candidate features (Talent Unlock, CV Reveal, Salary Reports, Verification Badges) are designed, built, and launched with their own promotional push.
- All figures are monthly run-rate (i.e. expected revenue *during* that month), not cumulative totals.
- VIP WhatsApp Alert pricing (K5 / K18) appears low relative to email alert packages — recommend reviewing this pricing before a marketing push, as it may be under-priced relative to perceived value.
