Seed & Strategic Growth Funding Round

This document is strictly confidential and intended solely for the named recipient(s). It contains forward-looking projections based on live platform data as of June 2026. Reproduction or distribution without written consent is prohibited.

Prepared by: Wakanda Jobs · Lusaka, Zambia · wakandajobs.com · June 2026

Executive Summary

Wakanda Jobs is a pan-African digital jobs platform headquartered in Zambia, operating the continent's first WhatsApp-first job alert and employer recruitment system. The platform currently aggregates **19,556 live job listings** across **16 African countries** through a proprietary AI-powered crawler network, and delivers personalised job alerts directly to candidates via WhatsApp — a channel used by over 90% of mobile internet users across Africa.

We are raising a **seed round of \$15,000-\$30,000 (K330,000-K660,000)** to accelerate employer acquisition in Zambia, launch in South Africa, Nigeria and Kenya, and scale our WhatsApp alert subscriber base to 1,000+ paying users within 12 months. In exchange we are offering either equity (15-25%), a structured revenue share, or a country partnership arrangement — detailed in Section 8.

375+

New Jobs/Day (SA)

22

Active Crawler Agents

The core thesis: Africa has 550 million working-age people. Formal online job boards exist but none are WhatsApp-first — the channel where African job seekers actually are. Wakanda Jobs is already built, already running, and already generating revenue. Investment accelerates distribution, not development.

Market Sizing

Market	Size	Our Relevance
Total Addressable Market (TAM) Online recruitment market, Sub-Saharan Africa + North Africa	\$620M/year Growing 18%/yr	Full continent coverage
Serviceable Addressable Market (SAM) ZM + SA + NG + KE + GH + TZ + RW + others we cover	\$185M/year	8 active crawler markets
Serviceable Obtainable Market (SOM) — Year 3 SME job postings, candidate subscriptions, data products	\$2-4M/year	Realistic 3-year capture

Why Africa, Why Now

- Africa has the world's **youngest and fastest-growing workforce** — 60% of the population is under 25
- Smartphone penetration growing 15-20%/year; WhatsApp is the **primary communication app** across all income levels
- Formal job boards exist (LinkedIn, Jobberman, BrighterMonday) but none focus on **WhatsApp-first delivery** or **pan-Africa aggregation**
- The majority of African employers are **SMEs with no ATS** — they need simple, affordable posting tools
- Salary data and labour market intelligence is **almost non-existent** for most African markets — a high-value data gap

Active Job Listings Volume by Country (30-Day New Jobs)

What Is Built (No Development Risk)

Module	Status	Description
Job Crawler Network	LIVE	22 active agents across 16 countries, running hourly, producing 375+ jobs/day in SA alone
VIP WhatsApp Alerts	LIVE	Personalised job alerts sent to candidates via WhatsApp using Whapi API. Paid subscription model.
Social Media Automation	LIVE	Auto-posts jobs to Facebook, LinkedIn, Telegram, Twitter/X, WhatsApp Channels on publish
Employer Job Packages	LIVE	14 pricing tiers from K15 to K7,500. Invoice system, payment processing, employer dashboard
Career Services	LIVE	CV review, rewrite, AI scoring, interview coaching. Order management, delivery tracking
Salary Reports	READY	Purchase and delivery system fully built. Zero reports published yet — immediate revenue opportunity
Candidate Alerts (Public)	LIVE	Job alert subscriptions with WhatsApp delivery, quota management, order processing
AI CV Analysis	LIVE	Claude AI analyses candidate CVs and recommends job filters automatically
Featured Listings	LIVE	Employers can pay for premium placement in search and on the homepage
Talent Hub / CV Search	BUILT	Employer CV search infrastructure exists. Needs candidate registration volume to activate

Revenue Traction (All-Time)

Revenue Source	Amount (ZMW)	Amount (USD)	Status
Employer Job Packages (invoices)	K1,465	~\$67	3 completed
Job Alert Subscriptions	K760	~\$35	3 approved
VIP WhatsApp Alerts (active)	K250	~\$11	11 active
Career Services	K219	~\$10	1 paid
Credit Purchases	K465	~\$21	2 approved
TOTAL ALL-TIME	K3,159	~\$143	Since May 2026

Important context: The platform launched revenue-generating features in May 2026. All K3,159 was earned in under 45 days with **zero marketing spend and zero sales effort** — organic only. This document projects what happens when capital is applied to distribution.

Job Volume Growth (2026)

Monthly Job Listings Growth — 2026 (crawler network expansion visible in May)

Revenue Architecture

#	Stream	Model	Unit Price	Target MRR (Yr 1)	Margin
1	Employer Job Packages	B2B subscription / pay-per-post	K150-K7,500	K8,000	85%
2	VIP WhatsApp Alerts	B2C recurring subscription	K20-K120/month	K5,000	95%
3	Career Services	B2C transactional	K50-K550	K3,000	70%
4	Salary Reports	B2B/B2C digital product	K300-\$2,000	K3,000	98%
5	WhatsApp Channel Sponsorship	B2B media / advertising	K500-K2,000/mo	K2,000	95%
6	Featured Listings / Data API	B2B premium / licensing	K100-\$2,000	K2,000	90%

Employer Package Pricing (All 14 Tiers Available Now)

Package	Price (ZMW)	Approx USD	Target Segment
Imani / Pathfinder / Ubuntu	K15-K40	\$0.70-\$1.80	Micro-businesses, first-time posters
Sankofa / Zambezi / Baobab	K65-K180	\$3-\$8	Small businesses, NGOs
Vibranium / Rising Star	K400-K650	\$18-\$30	SMEs, mid-size companies
Growth Engine / Enterprise	K1,250-K2,500	\$57-\$114	Large employers, recruitment agencies
Continental Reach / Talent Scout Pro	K4,500-K7,500	\$205-\$341	Multinationals, pan-Africa hiring

Base Assumptions

- Exchange rate: 1 USD = K22 ZMW (conservative; actual rate ~K22.50)
- Zambia operations Year 1; SA and NG/KE activated by Year 1 Q3
- Employer conversion rate: 3% of warm outreach → paying customer
- VIP alert growth: 50 new subscribers/month with K50 avg. Churn 15%/month initially, falling to 8%
- Career services: 10 orders/month Year 1 scaling to 50/month Year 2
- Salary reports: 3 published Year 1, 10 Year 2, 20 Year 3
- Hosting and infrastructure: \$150/month scaling to \$400/month

Annual Revenue by Stream — ZMW (Bootstrap Scenario)

Scenario A: Bootstrap (No Investment)

Metric	Year 1	Year 2	Year 3
Gross Revenue (ZMW)	K480,000	K960,000	K2,400,000
Gross Revenue (USD)	\$21,800	\$43,600	\$109,000
Operating Costs (ZMW)	K180,000	K360,000	K720,000
EBITDA (ZMW)	K300,000	K600,000	K1,680,000
EBITDA Margin	62%	62%	70%
EBITDA (USD)	\$13,600	\$27,300	\$76,400

Scenario B: With \$25,000 Seed Investment

Metric	Year 1	Year 2	Year 3
Gross Revenue (ZMW)	K840,000	K2,500,000	K6,500,000
Gross Revenue (USD)	\$38,200	\$113,600	\$295,500

Operating Costs (ZMW)	K420,000	K875,000	K1,950,000
EBITDA (ZMW)	K420,000	K1,625,000	K4,550,000
EBITDA Margin	50%	65%	70%
EBITDA (USD)	\$19,100	\$73,900	\$206,800
Investment uplift vs bootstrap	+75%	+160%	+171%

Revenue Comparison: Bootstrap vs Funded (ZMW)

Stage 1: Seed Round — \$15,000-\$30,000 (K330,000-K660,000)

Objective: Prove employer acquisition and hit K50,000/month revenue within 6 months

Use of Funds	USD	ZMW	% of Raise
Digital marketing (Facebook, Google, LinkedIn) — 12 months	\$12,000	K264,000	48%
Part-time sales rep commission (Zambia + SA outreach)	\$6,000	K132,000	24%
Salary report production (research, design, publishing)	\$3,000	K66,000	12%
Infrastructure scaling (hosting, APIs, tools)	\$2,500	K55,000	10%
Legal, banking, company registration SA/NG	\$1,500	K33,000	6%
Total	\$25,000	K550,000	100%

Stage 2: Growth Round — \$50,000-\$100,000 (raised Month 9-12)

Objective: Full SA, Nigeria, Kenya expansion. First \$100K USD/year revenue milestone.

Use of Funds	USD	ZMW	% of Raise
Full-time sales team (Zambia + SA + NG/KE agents)	\$30,000	K660,000	40%
Marketing — 4 markets simultaneously	\$30,000	K660,000	40%
Technical development (mobile app, ATS integrations)	\$15,000	K330,000	20%
Total	\$75,000	K1,650,000	100%

Self-funding milestone: At K50,000/month revenue (projected Month 6 with seed capital), the business becomes cash-flow positive and can internally fund operations. Stage 2 capital would be used purely for acceleration, not survival. This is the key de-risking point for investors.

Monthly Revenue Milestones

Milestone	Target Date	Revenue/Month	Key Driver
First K10,000/month	Month 2	K10,000	10 employer packages + 20 VIP alerts
First K25,000/month	Month 4	K25,000	SA launch + 50 VIP alerts + salary reports
Cash-flow positive	Month 5-6	K50,000	SA employers + 100 VIP alerts
First K100,000/month	Month 9	K100,000	Nigeria + Kenya employer base
\$10,000 USD/month	Month 12	K220,000	Full 4-country operation

We are flexible on structure to find the best fit. Three models are available:

Option A: Equity Investment (Best for financial investors)

Investment	Equity Offered	Valuation (post-money)	3-Year ROI (Scenario B)
\$10,000 (K220,000)	10%	\$100,000	$10\% \times \text{K}6.5\text{M} = \text{K}650,000$ (~\$29,500) = 195% ROI
\$20,000 (K440,000)	20%	\$100,000	$20\% \times \text{K}6.5\text{M} = \text{K}1.3\text{M}$ (~\$59,100) = 195% ROI
\$30,000 (K660,000)	25%	\$120,000	$25\% \times \text{K}6.5\text{M} = \text{K}1.63\text{M}$ (~\$74,000) = 147% ROI

At a 5× revenue multiple (conservative for a recurring-revenue SaaS platform at Year 3 scale), the Year 3 valuation of K6.5M revenue would be K32.5M (~\$1.48M). Equity return at 20%: **K6.5M (\$295,000) — a 14.75× return on \$20,000.**

Investor governance rights included: Quarterly financial reporting, board observer seat, pro-rata rights on future rounds, anti-dilution protection at seed stage.

Option B: Revenue Share (Best for cash-flow investors)

Investment	Revenue Share	Duration	Annual Payout (Year 2)	Annual Payout (Year 3)
\$15,000	15% of gross revenue	3 years, then 5% perpetual	K375,000 (\$17,000)	K975,000 (\$44,300)
\$25,000	20% of gross revenue	3 years, then 7% perpetual	K500,000 (\$22,700)	K1,300,000 (\$59,100)

No equity dilution. Investor receives fixed percentage of top-line revenue quarterly. Payback period at Year 2 revenue rates: **16-18 months.**

Option C: Country Partnership (Best for strategic operators)

A country partner manages one specific market (South Africa, Nigeria, or Kenya) — handling employer sales, local marketing, and customer support. In return they receive a share of all revenue generated from their country.

Role	Revenue Share	Capital Contribution	Projected Y3 Payout
South Africa Country Partner	35% of SA revenue	\$10,000–\$20,000 marketing fund	$35\% \times \text{K}3\text{M SA rev} = \text{K}1.05\text{M}$ (\$47,700)
Nigeria Country Partner	35% of NG revenue	\$8,000–\$15,000	$35\% \times \text{K}2\text{M NG rev} = \text{K}700,000$ (\$31,800)
Kenya Country Partner	35% of KE revenue	\$8,000–\$15,000	$35\% \times \text{K}1.5\text{M KE rev} = \text{K}525,000$ (\$23,900)

Note on partnership roles: A country partner is not passive. They are expected to drive employer sales in their market, attend networking events, manage local marketing campaigns, and act as the face of Wakanda Jobs in that country. This structure is ideal for a recruitment professional or HR consultant already embedded in their market who wants a scalable equity-like income without building a tech platform from scratch.

8 Competitive Landscape

Competitor	Markets	Strengths	Our Advantage vs Them
LinkedIn	Global	Professional network, brand recognition	LinkedIn CPM too expensive for African SMEs. We are 10-50× cheaper per hire.
Jobberman (NG/GH)	Nigeria, Ghana	Market leader in West Africa	No WhatsApp-first delivery. Limited SA/EA presence. Static listings.
BrighterMonday (Ringier)	KE, UG, TZ, ET	Backed by Swiss media group	No WhatsApp alerts. No multi-country aggregation. We crawl their listings.
Careers24	South Africa	SA market leader, high volume	SA-only. No mobile-first approach. We aggregate their listings + add WhatsApp distribution.
GoZambiaJobs	Zambia only	Local brand in Zambia	No automated distribution. No WhatsApp alerts. No pan-Africa coverage.

Our defensible moat: (1) A trained crawler network across 16 countries that produces 375+ SA jobs per day — this is months of engineering work to replicate; (2) WhatsApp-first delivery that reaches candidates where LinkedIn and email cannot; (3) The AI CV analysis and VIP alert pairing — no competitor offers this.

9 Risk Analysis

Risk	Probability	Impact	Mitigation
Employer acquisition slower than projected SMEs hesitant to pay for digital job posting	MEDIUM	HIGH	Free first posting removes barrier. Revenue share model as fallback. WhatsApp direct outreach to known HR contacts.
Competitor response BrighterMonday or LinkedIn clones WhatsApp feature	LOW	MEDIUM	12-18 month lead time to replicate. Brand loyalty compounds. Pan-Africa aggregation is the harder moat.
Key person dependency Solo founder; platform depends on one operator	MEDIUM	HIGH	Documented systems. Country partner model distributes operational load. Series A funds a technical co-founder.
Currency & payment risk ZMW depreciation; mobile money availability varies	MEDIUM	LOW	Pricing in local currency limits FX exposure. Multiple payment methods (card, mobile money, bank transfer).
Whapi API dependency WhatsApp may restrict business API access	LOW	HIGH	Email alert fallback already built. Telegram channel as secondary distribution. Candidate data owned by us.
Data privacy regulation POPIA (SA), NDPA (NG) compliance requirements	LOW	MEDIUM	Privacy policy in place. Data minimisation by design. Legal review budgeted in Stage 2.
Crawler source blocking Job sites block our scrapers	MEDIUM	MEDIUM	22 sources — redundancy built in. If one is blocked, 21 remain active. Rate-limited crawling to avoid detection.
Slow candidate registration Currently only 19 registered candidates	HIGH	MEDIUM	Facebook ad campaign for candidates is highest-priority spend. VIP alert product is the hook — K20 is accessible.

10 Exit Strategy & Investor Returns

Potential Exit Pathways (3-5 Year Horizon)

Exit Type	Potential Acquirer	Timing	Estimated Valuation
Strategic acquisition	BrighterMonday (Ringier), Jobberman, LinkedIn	Year 3-5	5-8× revenue = K32.5M-K52M (~\$1.5M-\$2.4M)
Private equity buyout	African PE funds (Helios, TLcom, Partech Africa)	Year 4-5	8-12× EBITDA = K36M-K54M (~\$1.6M-\$2.5M)
Management buyout	Founder buyback	Year 3+	Negotiated at agreed multiple
Continued dividends	N/A — profitable operating company	From Year 2	20% equity → K325,000+/yr from Year 3 EBITDA

Most likely exit for seed investor: At K50,000+ MRR (Year 1 target), the business becomes attractive for acquisition by a regional HR tech company. At that point, a 20% equity stake in a business valued at even 3× annual revenue (K1.8M at Year 2) = K360,000 (~\$16,400) — a 5.5× return on a \$3,000 investment, or a 82% return on a \$20,000 investment. More realistic Year 3 multiples are significantly higher.

11 What We Need From You

Financial Investor

- Capital: \$15,000–\$30,000
- Patience: 18–24 month horizon before dividends or exit
- Network: Introductions to HR managers, recruitment agencies, or corporate clients in your market
- Not required: Active involvement or technical knowledge

Strategic / Country Partner

- Capital: \$8,000–\$20,000 marketing fund
- Presence: Based in SA, Nigeria, or Kenya with HR/recruitment network
- Time: 20–30 hrs/month for employer sales and local marketing
- Skills: Sales, networking, B2B relationship building

What you will NOT need to do: Build, maintain, or understand the technology. The platform is fully operational. You are investing in distribution and market access — the tech is already your asset.

12 Other Documents You Will Need

Document	Purpose	When Needed	Status
Financial Model Spreadsheet	Detailed month-by-month P&L, cash flow, sensitivity analysis	Before finalising investment amount	Recommend building in Google Sheets
Term Sheet	Non-binding outline of investment terms (equity %, board rights, valuation)	When investor expresses interest	Template needed — consult lawyer
Shareholders Agreement	Legally binding: rights, obligations, voting, exit clauses	When deal closes	Must be drafted by a lawyer in Zambia
Cap Table	Track who owns what % — critical from day 1 of taking investment	Immediately	Start with a Google Sheets cap table now
Company Valuation Report	Independent third-party valuation for serious investors	Series A onwards	Not needed at seed stage
Data Room	Secure folder with financials, tech docs, contracts for due diligence	When investor requests due diligence	Prepare a Google Drive folder
One-Pager / Teaser	1-page summary for initial conversations — not this full IM	For cold outreach to investors	Extract from this document
CIPC / PACRA Registration	Formal company registration in Zambia (PACRA) and SA (CIPC)	Before receiving investment	Required for legal protection of both parties

Legal warning: Do not accept investment — even from friends or family — without a signed shareholders agreement. A handshake deal that goes wrong is worse than no deal. Budget \$500–\$1,500 for a Zambian commercial lawyer to draft a simple shareholders

agreement before closing any equity deal.
